## Length, Mdytho and IUieight

## Procedure:

1. At each station, find the length, width, and height of the objects.
2. Record your measurements in cm.
3. Once you have all your measurements, calculate the volume using the formula length x width x height $=\mathbf{c m}^{3}$.

Table 1: Volume of Regular Shaped Objects

| Object Length Width |  | Height | Volume |  |
| :--- | :--- | :--- | :--- | :--- |
| 1. |  |  |  |  |
| 2. |  |  |  |  |
| 3. |  |  |  |  |
| 4. |  |  |  |  |
| 5. |  |  |  |  |
| 6. |  |  |  |  |
| 7. |  |  |  |  |
| 8. |  |  |  |  |

Volume of graduate with object: Volume of graduate without object:

Procedure:

1. Add water to the graduated cylinder. Record the \# of mL.
2. Drop one object into the graduated cylinder.
3. Record the new level of water in mL .
4. Subtract the starting $m L$ from the final $m L$ to find the volume ( mL ) of the object.

Table 2: Volume of Irregularly Shaped Objects

| Object | Starting mL | Ending mL | Volume |
| :--- | :--- | :--- | :--- |
| 1. |  |  |  |
| 2. |  |  |  |
| 3. |  |  |  |
| 4. |  |  |  |
| 5. |  |  |  |
| 6. |  |  |  |
| 7. |  |  |  |
| 8. |  |  |  |
